

ES 6000 OE replacement Front spring seat shocks.

The Pro Comp ES6000 is the ultimate OE replacement front spring seat shock for late model Ford, GM, Nissan and Toyota trucks. These ES6000 shocks are engineered for demanding driving conditions and optimum load control. They feature increased compression and rebound control, velocity sensitive valving and nitrogen gas pressurization for enhanced off road handling and performance (shock only – does not include coil or upper spring seat). These OE replacement shocks are compatible with all stability controlled platforms. Not compatible with ride control or other electronically controlled shocks. Shocks sold separately
